1. Open your Directors Chair box and set up your chair in the following position.

2. Take the white under canvas from the bottom of the cushion seat. Place the black rods from either side of the canvas, and place them in the grooves of the chair.

Then, pull the canvas along so the rods span the length of the groove.

3. Bring the arms of the chair up and place the cushion back rest on the back of the chair as shown in the following photo.

4. Next, the stainless-steel hinges need to be pushed down so they are flush like the following picture.

We find this to be easier when you push down on these hinges using your foot.

5. Your final step is to get the cushion seat, and velcro it onto the white under canvas like so.

Your Directors Chair is now set up and ready to be used! Need to store away? Just follow these instructions in reverse, it couldn't be simpler!

We hope you enjoy!
